

2.0 Students understand and describe simple additions and subtractions:

2.1 Use concrete objects to determine the answers to addition and subtraction problems (for two numbers that are each less than 10).

Literacy Strategy- Stop and Think:

Friends

I have two friends at school. One friend is named Joe. Joe is nice to me. I also have a friend named Julie. Julie is nice to me too. They are my best friends at school. When I go home, I play with my friends on my street. Their names are Mike, Deb, Jane, and Dora. They are fun to be with. My birthday is coming soon. We are planning a party. How many friends will I invite?

Stop and Think

Okay, I have two friends at school.

Write the number 2 _____.

At home, I play with Mike, Deb, Jane, and Dora.
How many children do I play with at home?
Write the number here _____.

The question asked: How many friends will I invite?

Draw 2

Draw 4

Count and draw the total.

$$\square + \square = \square$$

Read: Two plus four equals six.

I will invite 6 friends to my party! You did it!
