

## California Content Standards — Grade 2

By the end of grade two, students understand place value and number relationships in addition and subtraction, and they use simple concepts of multiplication. They measure quantities with appropriate units. They classify shapes and see relationships among them by paying attention to their geometric attributes. They collect and analyze data and verify the answers.

### Number Sense

- 2.0** Students estimate, calculate, and solve problems involving addition and subtraction of two- and three- digit numbers:
- 2.1** Understand and use the inverse relationship between addition and subtraction (e.g., an opposite number sentence for  $8+6 = 14$  is  $14- 6 = 8$ ) to solve problems and check solutions.

### Student Exercise:

Write some number sentences for the following fact groups:

12, 14, 26

$$\square + \square = \square$$

$$\square + \square = \square$$

$$\square - \square = \square$$

$$\square - \square = \square$$

17, 14, 31

$$\square + \square = \square$$

$$\square + \square = \square$$

$$\square - \square = \square$$

$$\square - \square = \square$$
